PRODUCT DESCRIPTION - PD 208286-16.1EN

Material no. 13527032

CHOOZIT™ Lactis A FRO 10 D

CHOOZIT™ Cheese Cultures

Description

Concentrated, deep-frozen culture in pellet form for direct inoculation of process milk

Thermophilic single strain culture

Usage levels

Product	Dose
soft cheese	2 - 5 g / 100 l
semi-hard cheese	5 - 8 g / 100 l
large-eyed cheese	5 - 8 g / 100 l

The quantities of inoculation indicated should be considered as guidelines. Supplement cultures may be required depending on technology, fat content and product properties desired.

We do not accept any liability in case of undue application.

Directions for use

Take package from freezer just before use. Disinfect opening area with ethanol (approx. 70 %) before opening package. Pouch is to be opened along the tear-open notch parallel to the top edge. Add frozen culture directly to the process milk under aseptic conditions. It has to be considered that the whole content of the pouch has to be inoculated per propagation in order to guarantee constant product quality.

Composition

Lactobacillus delbrueckii subsp. lactis

Properties

Thermophilic culture acidifying to a low pH. CHOOZIT™ Lactis A FRO 10 D forms lactic acid of the D(-) type. Due to its low proteinase and very high peptidase activity, it is applied in cheese production - frequently combined with other cultures - for the improvement of aroma and reduction of bitterness. In large-eyed cheese CHOOZIT™ Lactis A FRO 10 D supports the growth of propionic acid bacteria.

Physical/chemical specifications

Direct inoculation:

Test medium:
reconstituted skimmilk with 9 % of dry matter
fractionated heating at 95 ± 3 °C for 30 min

Fermentation:
inoculation amount: 1 pouch / 5,000 l
inoculation and incubation temperature: 42 °C

pH after 25 h	<= 4.20

Microbiological specifications

Microbiological quality control - standard values and methods

Cell count	>= 1.5E+11 CFU / D
Non-lactic acid bacteria	< 500 CFU / ml
Enterobacteriaceae	< 1 CFU / ml
Yeasts and Moulds	< 1 CFU / ml
Enterococci	< 10 CFU / ml
Clostridia Spores	< 10 CFU / ml
Coagulase-positive staphylococci	< 1 CFU / ml
Salmonella spp.	neg. / 25 ml
Listeria monocytogenes	neg. / 25 ml

Analytical methods available upon request

Storage

8 months from date of production at <= -45 °C

Packaging

PE pouch

Quantity

at least 500 g per packaging unit

Material no. 13527032

CHOOZIT™ Lactis A FRO 10 D

CHOOZIT™ Cheese Cultures

Purity and legal status

CHOOZIT™ Lactis A FRO 10 D meets the specification laid down by the EU legislation.

Label food regulations should always be consulted concerning the status of this product, as legislation regarding its use in food may vary from country to country.

Safety and handling

MSDS is available on request.

Kosher status

Dairy Kosher

Halal status

Halal certificate available on request

Allergens

Below table indicates the presence of the following allergens and products thereof:

Yes	No	Allergens	Description of components
	X	wheat	
	X	other cereals containing gluten	
	X	crustacean shellfish	
	X	eggs	
	X	fish	
	X	peanuts	
	X	soybeans	
X		milk (including lactose)	used as fermentation nutrient*
	X	nuts	
	X	celery	
	X	mustard	
	X	sesame seeds	
	X	sulphur dioxide and sulphites (> 10 mg/kg)	
	X	lupin	
	X	molluscs	

* used as fermentation nutrient. Danisco has determined that fermentation nutrients are outside the scope of US and EU food allergen labelling requirements.
Local regulation has always to be consulted as allergen labelling requirements may vary from country to country.

Additional information

The values indicated in this document correspond to results from standardized laboratory tests. They should be considered as guidelines. In practice, other values are expected depending on the type of product and technology. Due to advances in technology and continuous product improvement it may be necessary to change standard values in the future.
