Directions for use

Take package from freezer just before use. Sanitize sachet with chlorinated water or appropriate sanitizer before opening (blot dry with a paper towel if necessary to prevent clumping around sachet opening). Once the sachet is open, pour the culture directly to the pasteurized mix. Agitate for approximately 15 to 30 minutes on low speed to avoid foam and air introduction into the milk. The whole content of the sachet has to be applied in order to guarantee constant product quality.
